

# Empirical Energy Case Study

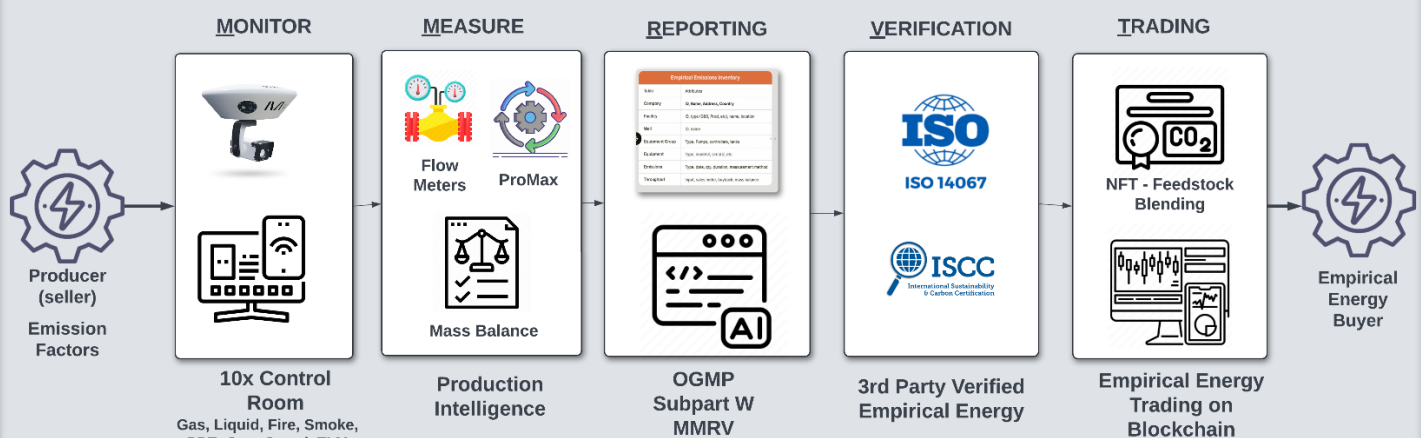

## Challenges Between PureWest & Gunvor

Downstream Buyers Want Certified Bio-Methanol, Bio-Plastics, Blue Hydrogen, LCFS, Low-CI LNG

## SOLUTION

### Transforming Emission Factors into Empirical Energy

Autonomous365: Management Platform

The Future of Energy (monitoring, measurement, reporting & trading)

# Empirical Energy Case Study RESULTS

CleanConnect.ai  
Visual Automation

ProveZero

## Deploy for Enhanced Capabilities

### Regulatory Reporting

Automate and streamline **Regulatory Reporting**, ensuring compliance with the latest environmental standards and reducing administrative burdens

### Carbon Accounting

Precise **Carbon Accounting** by integrating real-time data and rigorous measurement principles, supporting effective carbon management and transparency

### Differentiated Gas

Enable **Differentiated Gas** with verified data on quality and emissions, allowing you to position them as premium offerings in the market

### Defensible Emissions

Allow **Defensible Emissions** with robust measurement and blockchain verification, strengthening your position with regulators and stakeholders

### Risk-based Monitoring

Use real-time data and analytics for **Risk-based Monitoring**, proactively identifying and addressing potential issues to minimize operational disruptions and compliance failures

### Operational Innovation

Drive **Operational Innovation** by integrating advanced AI technology and automation, which improve efficiency and foster continuous improvement in your processes

**We Are Looking for The Next Producer Who Wants a 10% Premium  
for Creating & Trading Empirical Gas**

## SCHEDULE YOUR DISCOVERY CALL

Contact: Mark Smith – [mark@CleanConnect.ai](mailto:mark@CleanConnect.ai) to schedule a private strategy call and get your blueprint for transitioning from emission factors to empirical energy.
